

Mini Daimo

...a model of the Parolin line

60 cc 1998/2004 CSAI homologated

Short description

Chassis made of seamless special Cr Mo steel tubes of 28 mm (1.10 in) in diameter. Tube cutting and welding are performed using laser technology machines and tube bending with state of the art CNC machines.

Tube ends are cut by laser prior to welding in order to allow a flawless seam.

Wheelbase is 900 mm (35.43 in).

All accessories are cut from best aluminum solid pieces and then gold or titanium anodized, the first being done with state of the art CNC fully automatized machines and held to tight tolerances.

All these operations are performed within PAROLIN RACING KART's facilities.

Brakes mechanic with the option of an hydraulic. Rear brake disk is 180 mm (7.09 in) in steel. Brakes, as all accessories, are produced within our facilities.

Rear axle is supported by two bearings and is 25 mm (0.98 in). Optional 30 mm (1.18 in) is available.

Wheels are 150/110, made of aluminum and heat treated.

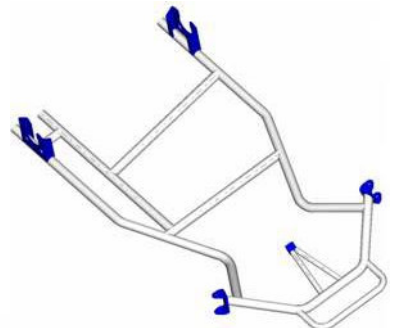

It presents right-left extra seat supports.

The anatomic steering wheel is 280 mm (11.02 in) or 260 mm (10.24 in) in diameter, made of aluminum.

Stub axles are welded.

The chassis is powder coated in metallic black, Parolin red or metallic blue.

Tyres, engine mount and bodywork are excluded.
